PROFILE

After a broad and diverse professional career, I have found my true calling in the world of technology. Graduated in Systems from the National Technological University and with a solid complementary training, I specialize in software development and systems administration. My goal is to apply my knowledge to build technological solutions that add value to organizations and contribute to the environment.

EMPLOYMENT HISTORY

Developer & Devops at Freelance, Buenos Aires
March 2021 — Present

Freelance developer and DevOps with experience deploying Python/Django web applications using Docker, Nginx, and Gunicorn. Experience in the software development lifecycle.

IT Support at Multimedios CNA, La Plata
January 2020 — Present

Skilled in providing end-user support and endpoint management, I have a proven track record in installing, configuring, and troubleshooting computer systems. I am also proficient in resolving hardware and software issues, and I have experience in implementing new technologies and administering networks and servers.
